PROFESSIONAL SUMMARY

Detail-oriented Cybersecurity Analyst & Computer Science Graduate specializing in SOC operations, incident response, security monitoring, and threat detection. Skilled in evaluating vulnerabilities, analyzing logs, enforcing access control, and developing secure tools using Python and SQL. Experienced in supporting IT operations, maintaining system uptime, and adhering to organizational security baselines.

TECHNICAL SKILLS & CORE COMPETENCIES

- **SOC Operations:** Security Monitoring, Incident Response, Vulnerability Assessment, Threat Analysis, Log Analysis, Access Control, Encryption (SHA-256, Caesar Cipher), Network Security.
- **Tools & Platforms:** Firewalls, IDS/IPS, VPN, SIEM Concepts, AWS, Azure, Replit.
- **Languages & Frameworks:** Python, SQL, Java, HTML, CSS, JavaScript, React.
- **Soft Skills:** Problem Solving, Critical Thinking, Technical Troubleshooting, Teamwork, Time Management.

SECURITY PROJECTS

RiskGuard & Nazar - Operational Security & Fintech Risk Systems *2026*
(Python / Replit)

- Engineered a Python GUI security app with Maker-Checker dual control and Segregation of Duties (SoD) to eliminate single points of compromise.
- Implemented SHA-256 hashing and UUID4 markers for immutable audit trails, and deployed a Fintech simulator at Amad Hackathon (Incubated at Amad Incubator).

Password Security Evaluator & Testing System (Python) *2026*

- Built an automated password entropy verification tool in Python to analyze credential strength and mitigate brute-force authentication risks.

OHJR - Cybersecurity Awareness Escape Room Application *2024 - 2025*

- Co-developed an interactive cybersecurity awareness escape room featuring gamified challenges and Caesar Cipher cryptographic puzzles.

Secure Hospital Database System (SQL) *2023*

- Architected a relational SQL database structure enforcing data privacy, Role-Based Access Control (RBAC), and encryption controls.

IT OPERATIONS & TRAINING EXPERIENCE

Ministry of Transport and Logistics Services - IT Department *2025*

- Supported daily IT operations by troubleshooting software/hardware issues, maintaining system stability, and resolving user service tickets.
- Assisted in continuous security system monitoring to ensure service availability and minimize operational downtime.
- Collaborated with cross-functional technical teams while strictly adhering to organizational IT security policies.

EDUCATION & CERTIFICATIONS

Bachelor of Computer Science (Cybersecurity Specialization) *2025*

King Khalid University, Saudi Arabia

- **Certifications:** Certified Cybersecurity Analyst (IBM & ISC2) | Network Security & Incident Response | Access Control Principles | Cloud Computing Fundamentals
